

POWER-PACKER

PATIENT HANDLING

M K 5

The MK5 is a reliable self-contained hydraulic actuator, of which more than a million have already been built. The pump, cylinder, valves and reservoir are combined into one, compact, maintenance-free unit.

Every MK5 comes with a pressure relief valve and a flow control valve to ensure smooth descent. The MK5 is easy to install and is built for long life.

POWER-PACKER Europa B.V. is your partner when it comes to height adjustment for medical equipment. We are an OEM supplier to the leading manufacturers of hospital beds, physiotherapy tables, trolleys, operating and scan tables. POWER-PACKER offers a complete range of hydraulic- and electro-hydraulic actuators for these applications. Our manual hydraulic systems have proven their quality in medical furniture from the world's leading manufacturers for the past 20 years. POWER-PACKER's knowledge of electro-hydraulic systems has resulted in electro-hydraulic solutions for the high-tech end of the medical market.

Features and benefits of the MK5:

- Compact, self-contained design
- Quiet and smooth operation
- Maintenance-free
- Easy to install
- Hand release option
- "Autoclave" proof

The MK5 can be used in the following applications:

- Hospital beds
- Home care beds
- Patient lifting devices
- Examination couches
- Physiotherapy tables
- Chairs
- and many other applications
